Dear Mr. Jones,

**COMPLIANCE REPORTING: PORT GEOGRAPHE DEVELOPMENT COASTAL STRUCTURES**

Department of Transport and Major Infrastructure (DTMI), on behalf of the Minister for Transport, provides the attached compliance reporting pursuant to Condition 3 of Ministerial Statement 990 (MS 990) for the 2024-2025 annual reporting period.

It is requested that publicly available documentation be limited to the Statement of Compliance and the associated Audit Table. DTMI requests to restrict the publication of confidential documents referenced in the Audit Table and the additional supporting documents. The supporting documents referenced in the Audit Table can be made available to Department of Water and Environmental Regulation (DWER) on request.

In accordance with Condition 7.6 of MS 990, the Environmental Monitoring and Management Plan (EMMP) was originally approved by DWER on 17 November 2016. The current revision of the EMMP (Revision 7A) was approved by DWER on 14 March 2024 and is the operational document for environmental monitoring and management of maintenance campaigns.

Pursuant to Condition 7.6 of MS 990, DTMI completed an annual review of the EMMP and determined no changes were required for this compliance reporting period.

Should further information be required please contact Shelley Grice, Director Maritime Assets by email on [Shelley.Grice@transport.wa.gov.au](mailto:Shelley.Grice@transport.wa.gov.au).

Yours sincerely,

DTMI previously investigated if similar edge retreat observed in 2022/23 exceeded the EMMP Management Target of <i>"No change in position of seagrass meadow edge outside of the predicted zone of influence of the offshore disposal area beyond natural variability"</i> and summarised the findings in a technical note (BMT 2024a) provided with the 2022/23 Statement of Compliance. The technical note summarised the available literature and the results of seagrass meadow edge analysis between 2018 and 2023 to attempt to quantitatively define the term "natural variability", and associated monitoring data to assess compliance with the EMMP Management Target for the 2022/23 maintenance dredging campaign. The technical note concluded seagrass edge retreat was considered within natural variability. The edge retreat at the reference survey areas following the 2024/25 maintenance dredging campaign was of similar magnitude as observed in 2022/23 and in 2023/24 and considered within natural variability as per the outcomes of the technical note (BMT 2024a). Therefore, the EMMP Management Target and overcharging Condition 7.2 of MS 990 were both met during this reporting period (BMT 2025).</p>
990:M3.6	Compliance Reporting	The proponent shall prepare a Statement of Compliance for each consecutive 12 month period commencing on the date of the Statement and submit each Statement of Compliance to the CEO no later than three months following the end of each 12 month period it addresses.
