IMMOBILISER INFORMATION

When does a vehicle require an immobiliser to be fitted?

- On the grant of a vehicle licence.
- When transferring the vehicle licence.

If you already have a licensed vehicle in your name, you are not required to fit an immobiliser, unless:

- The vehicle licence expires by more than three months. As the renewal period has been exceeded, you will be required to have the vehicle inspected before it can be re-licensed.
- If the vehicle licence is being transferred. In this circumstance it is the purchaser's responsibility to ensure that an approved immobiliser is fitted to the vehicle.

This requirement to fit an immobiliser applies to the following vehicles:

- 4WD vehicles.
- Family cars.
- Mini-buses.
- Station wagons.
- Taxis.
- Utilities.

Which vehicles are exempt from the fitment of an immobiliser?

- All vehicles used for emergency purposes (as defined in the *Road Traffic Code 2000*).
- A vehicle licence transfer which is subject to a Court Order.
- A vehicle licence transfer which is as a consequence of a bequest from a deceased estate.
- Caravans.
- Mopeds and motorcycles.
- New light goods vehicles with a GVM not greater than 4500 kg that are being licensed for the first time (these are essentially vehicles which fall into the Australian Design Rule Category NA and NB1).
- Trailers.
- Vehicles that have a tare weight over 3000 kg or a GVM or aggregate weight over 4500 kg.
- Vehicles which are licensed as farm vehicles under regulation 8 of the *Road Traffic (Vehicles) Regulations 2014*.
- Vehicles which are more than 25 years old (i.e. vehicles which are licensed as veteran, vintage, post vintage and invitation class are not required to have an immobiliser fitted).
- Vehicles which are transferred to used car dealers for stock intended for resale.

The following are classified as approved immobilisers.

An immobiliser:

- That is factory fitted (e.g. fitted at the time of manufacture). The vehicle manufacturer's handbook should be able to confirm this.
- Fitted to a vehicle before 1 July 1999 that is self-arming and immobilises the engine either by interrupting the fuel, ignition, starter or engine management system.
- That complies with Part III of ECE 97 Vehicle Alarm Systems published by the United Nations Economic Commission for Europe.
- Fitted to a vehicle as an integral part of an alarm system complying with AS/NZS 3749.1:1997 Intruder alarm systems, Road vehicles, jointly published by Standards Australia and Standards New Zealand.
- That complies with AS/NZS 4601:1999 Vehicle immobilisers, jointly published by Standards Australia and Standards New Zealand.
- A device known as the GT2000 Gearlock Auto-armed Pinlock, manufactured by Grip-Tech (Pty) Ltd, that is fitted to a vehicle in accordance with the manufacturer's instructions.
